CABLE 86

The Cooper Union for the Advancement of Science and Art
New York, New York

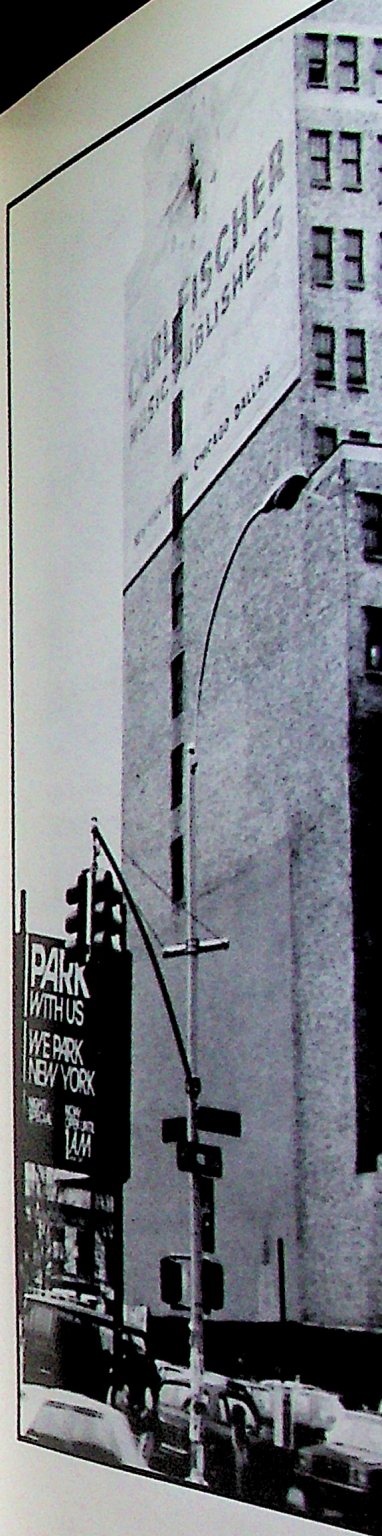

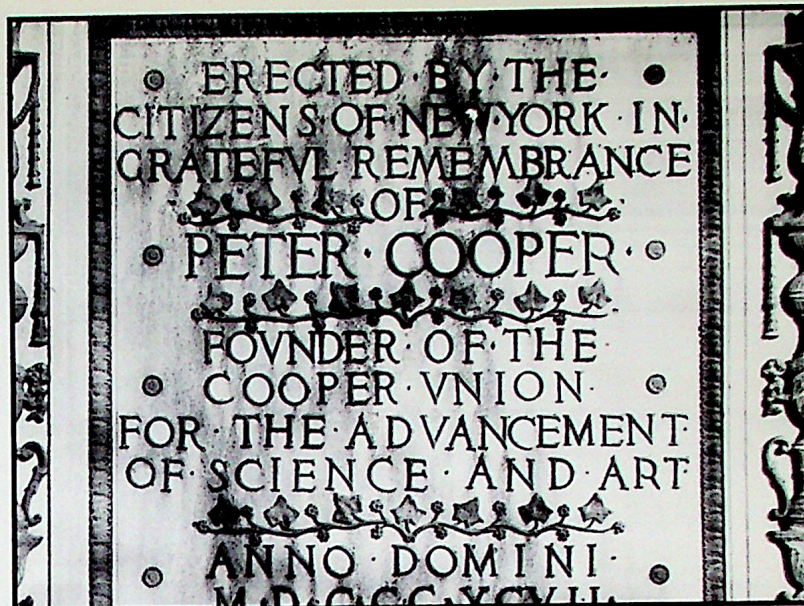

Editor's Note

In Cable 1986 we have reestablished the idea of union. We have gone back to Peter Cooper's dream, the union of engineers, artists, and architects. What follows is a salute to Cooper Union's most important aspect, the student.

Yours,

Matt Stock
Russ Johnson
Paul Ferlazzo
Scott Barbey
Andrew Durston

President Bill Lacy

Perhaps the reason a yearbook is referred to in
though in your case it stands for four or more years
is because your time at Cooper Union, no doubt
been compressed into a much shorter period. Most
reaction to being included in this yearbook will
astonishment that their college years (for many
they'll ever have) are over!

We often ignore the fact that years pass without
ourselves. "Am I where I am supposed to be?"
I should be doing?" "Am I the central figure in
player?" Diarists and keepers of journals attempt
chronicling of daily events, to bring the reality of
accountability and to measure progress against
issue of *The Cable* is, in a sense, your four year
actual tables obtain, you can expect to have five
volumes in your lives. If you are satisfied with
sure you continue to get as much from future years
from these just passed. If, on the other hand, this
your professional life has many blank pages on
you had written, resolve that future editions will
overflowing. There is a line from the Broadway
"I'm much older than I ever intended to be." It
sooner than you think.

During the four years that you've been here, Cooper
enjoyed significant changes that affect all of us in
the area of academics, for instance, the Architectural
re-named in 1982 in honor of alumnus Irwin S.
Irwin S. Chanin School of Architecture has grown
that time to occupy a position referred to by one
magazine as "perhaps the most important School
in the world."

In the School of Art extensive renovations were
create a safe working environment, and last year
painting studios were renovated and a gallery in
sixth floor for student use.

The study of Humanities and Social Sciences at
new direction with the appointment of Michael
Dean of the Faculty. Under his leadership, and with
of an enthusiastic faculty, courses in Humanities and
Sciences have been integrated more fully into the
three professional schools.

In the last three years of your time here, we have
folding of a new program for engineering students.

A black and white photograph showing a person's profile in the foreground, looking out over a cityscape. The person is wearing a dark jacket. In the background, a large, light-colored building with a prominent arched entrance is visible. The image is oriented vertically on the page.

Sincerely yours,

ours, *John May*

Vice President
Alan Green

January, 1986

Dear '86ers:

Your editors are probing the origins and implications of the name of your yearbook: "The Cable." In 1922, when the first issue was published, that title was chosen as a metaphor for the bonds of fellowship and friendship that were developed among students while at The Cooper Union. A nice thought; one which I trust — and we must assure — still prevails.

The title conjures up other images. Cables may suspend, may transmit, may link, may aid in communication. Perhaps these functions suggest some additional metaphors for Cooper Union.

We're seeing many more ways by which the Cooper Community is, or can be, inter-connected — bound together — as a true collegial community. For instance, the humanities and social sciences provide opportunities for students from all three schools to come together in the classroom. The formal establishment of The Faculty of Humanities and Social Sciences, and the enrichment of its course offerings, enhances these opportunities. The Faculty-Student Senate, the one body at Cooper Union with members from all the academic programs, is even more effective, and in time will likely become an even greater representative of all its constituents. More students are "crossing the street" for courses outside their disciplines, and for informal activities. The elected student representatives have been meeting and working on problems common to all students; such a group comes close to a Cooper-wide student council. The intramural and recreation programs offer more activities and attract more participants from across Cooper Union than ever before. Clubs and student organizations further foster these inter-connections.

Our Schools of Architecture, Art, and Engineering will always have strong professional programs and individual identities. In addition, a "cable" of initiatives to help us in bonding together as a community is being spun. You saw some of the individual strands integrated while you were here; we anticipate that you will see even more upon returning as alumni. And we hope that the elements of such a Cooper Community will reinforce the appropriateness of the name "Cable" for years to come.

Best wishes,

Vice President
Alan Cooper
